

Good Vibrations

K3 Vibratory Feeder

KEY BENEFITS

On avg. 35%
more accurate
than traditional
vibratory
technologies

Quick change
design &
practically
maintenance free

Minimal heat
dissipation &
less energy
consumption

Gentle handling
of fragile
material

FOOD

- › Especially suitable for fragile food ingredients
- › **For example:** high accuracy feeding of finished food products to packaging lines

- › Accurate feeding for the optimal dosage of pharmaceutical ingredients

- › **For example:** feeding of uncoated tablets to coating lines

PHARMA

RECYCLING

- › Reliable feeding of hard-to-handle materials such as recycled pellets

- › **For example:** feeding of regrind to plastic extrusion lines
